SINGLE SPLIT KEY FEATURES

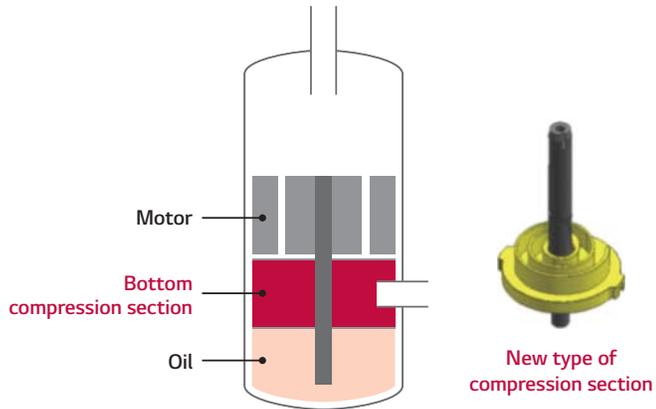

ENERGY EFFICIENCY

New Type Scroll Compressor

(UU36WR, UU37WR, UU42WR, UU43WR, UU48WR, UU49WR, UU60WR, UU61WR)

Scroll + Rotary compressor

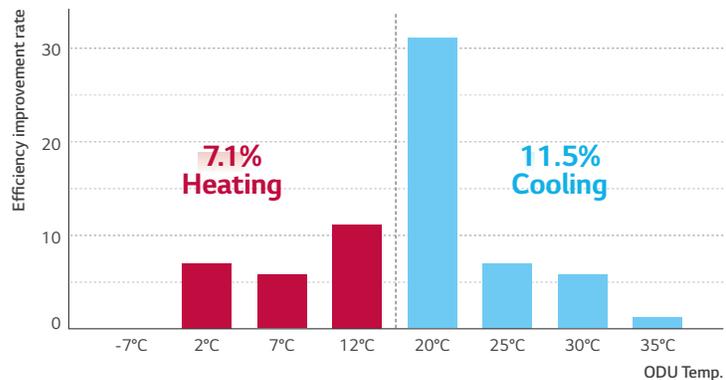

- Scroll compression + Rotary structure
- High efficiency (seasonal efficiency improvement)
- Low noise (high speed possible)
- Wide operating range (15~150Hz)

Seasonal energy efficiency

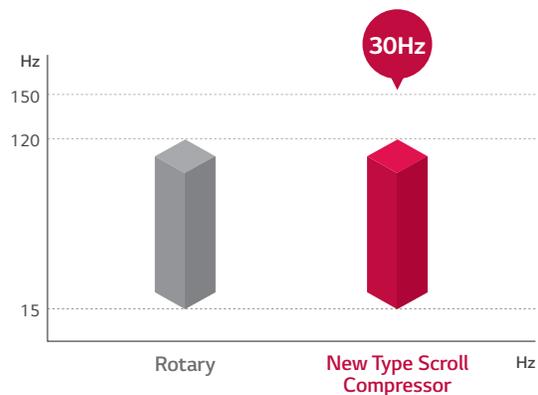

SEER 11.5%, SCOP 7.1% improvement (vs. rotary)

• LG Internal test result, Based on single split 12 kW

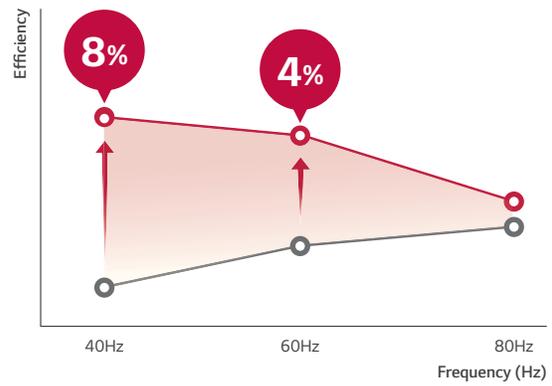

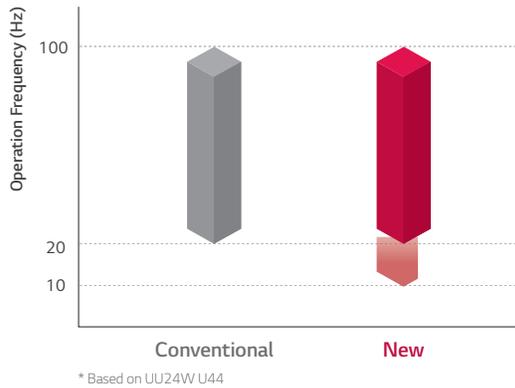

Wide Operation Range

- Optimized for various cooling & heat load operation
- World best compressor speed (up to 150 Hz)
- Optimized for even low load operation (down to 15 Hz)
(Efficiency increases / Improved comfort)

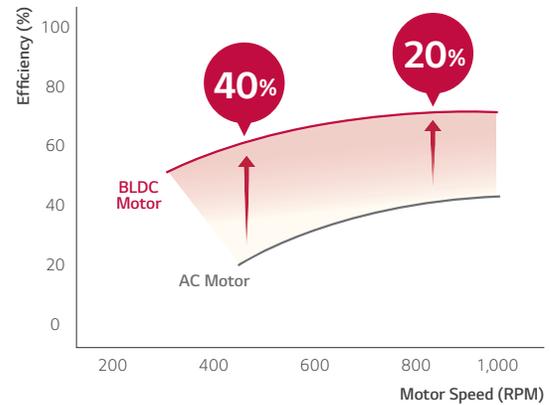

BLDC (Brushless Direct Current Motor) Compressor

LG air conditioners are equipped with a BLDC compressor that uses a strong neodymium magnet. The compressor has improved efficiency compared to standard AC inverter products and it is optimised for seasonal efficiency.

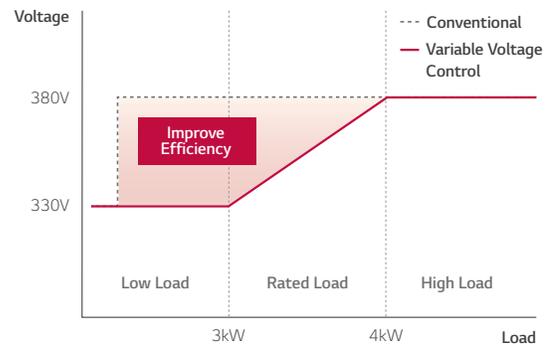

BLDC Fan Motor

The BLDC Fan motor is more efficient than a conventional AC motor, offering an additional 40% energy savings at low speeds and 20% at high speeds.

Variable Voltage Control

The compressor of Standard Inverter improves efficiency by adjusting the compressor input voltage depending upon the compressor input load.

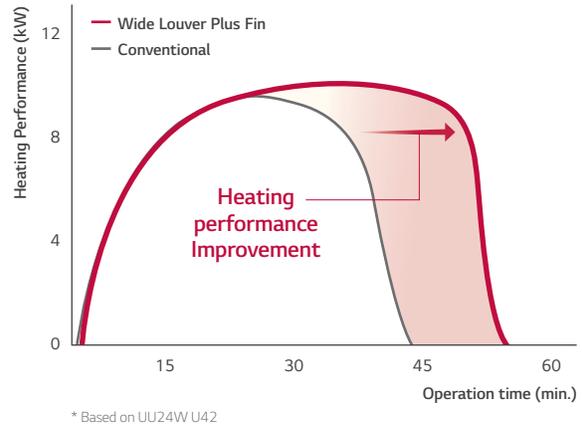

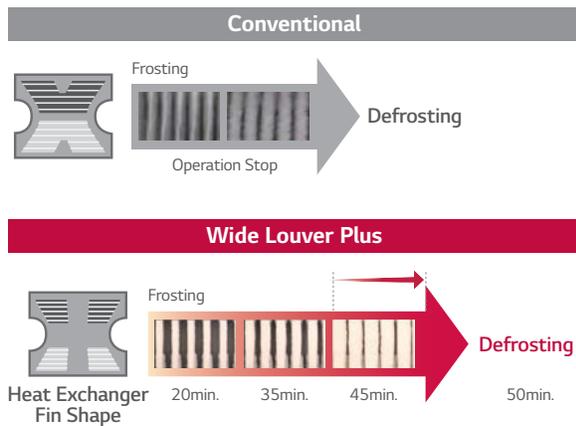

(Standard Inverter : capacity over 7kW)

SINGLE SPLIT KEY FEATURES

ENERGY EFFICIENCY

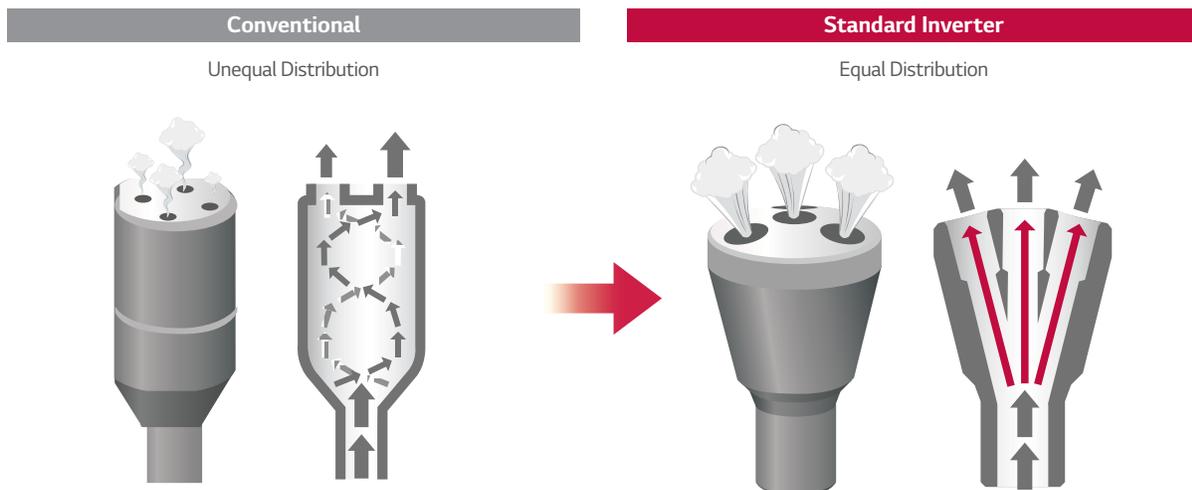

Wide Louver Plus Fin

Wide Louver Plus fin technology increases 11% of full load heating performance and 6% of COP compared to conventional fin. It can minimize frosting of the heat exchanger and delay the start of defrosting operation.

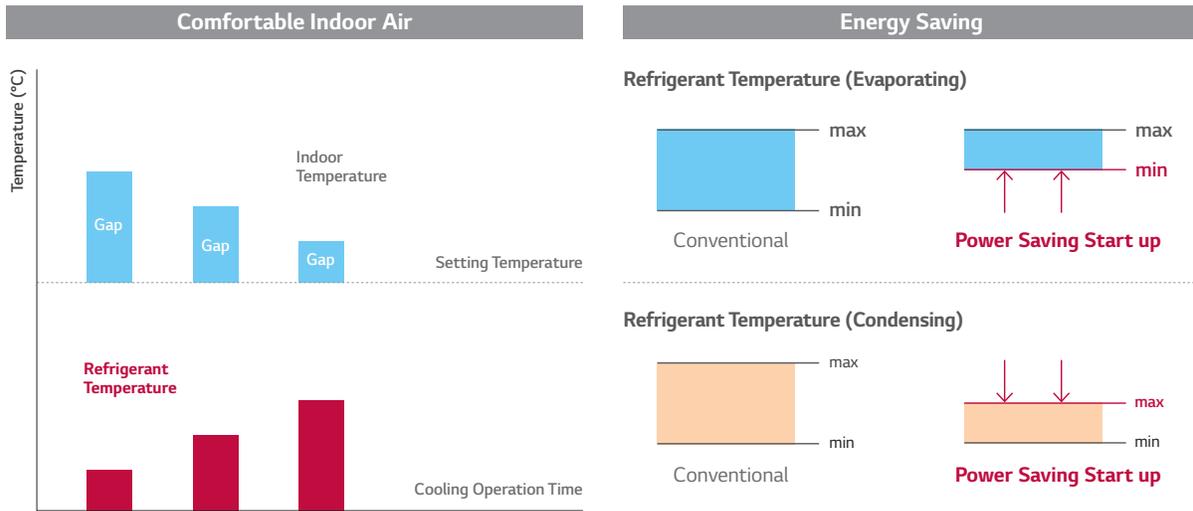

Optimised Heat Exchanger Path

Optimized heat exchanger path improves cycle efficiency up to 5%.

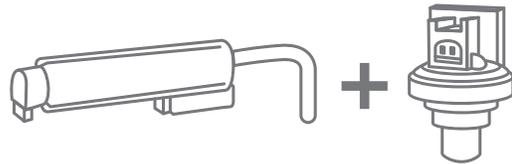

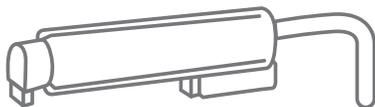

Power Saving Start Up

LG commercial air conditioners will automatically alter the temperature of discharge air by controlling their refrigerant temperature based on the difference between the indoor temperature and the target indoor temperature. During cooling operation, evaporating temperature will increase if the temperature difference reduces. This leads to extremely comfortable indoor air whilst minimizing energy consumption.

Quick Operating Response

- Conventional**
- Step 1** Detect current temperature of the refrigerant, indoor and outdoor temperature
- Step 2** **Estimating Pressure**
Gauge target pressure to operate the compressor, based on the corresponding temperature data

▲

This algorithm is more likely to be impacted by temperature change hence consumes more time to calculate proper operation range of compressor to reach target performance point.

- Standard Inverter**
- Step 1** Detect refrigerant pressure and temperature simultaneously to ensure that the compressor is available for target cooling operation

▲

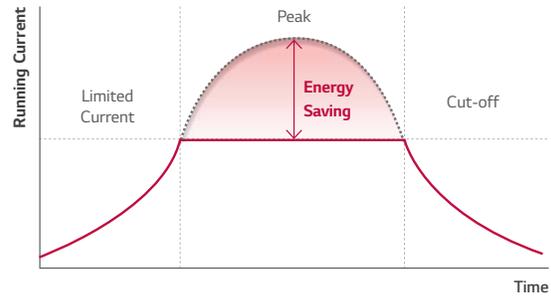

This ensures to reach the target performance point operating efficiently and reliably.

SINGLE SPLIT KEY FEATURES

ENERGY EFFICIENCY

Peak Current Control

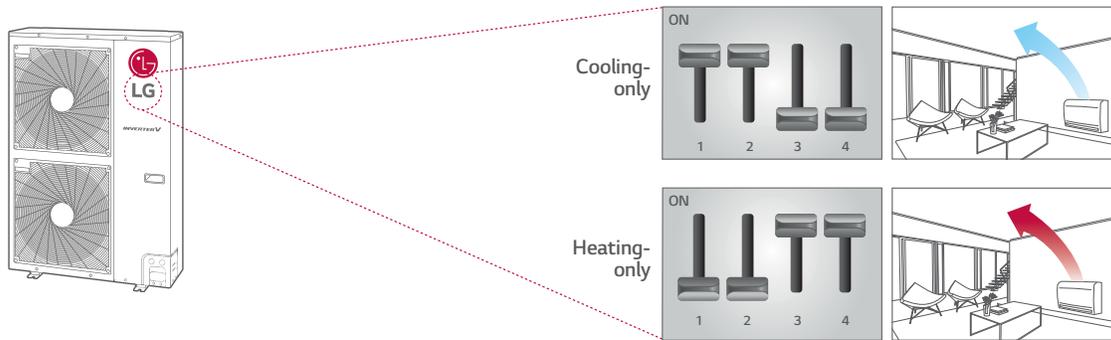

The peak current control function prevents the air conditioner from running at the maximum level while maintaining current system settings, in order to reduce energy consumption. This function helps minimize energy costs during the peak periods of energy use when the energy billing is much higher.

* Standard Inverter : capacity over 5kW

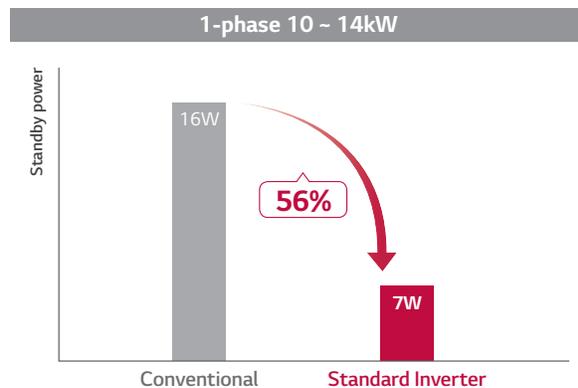

Mode Lock

Set the operation mode to either cooling-only or heating-only; either by adjusting the wired remote controller or setting the DIP switch to avoid combined use of cooling and heating. (Some models need wired remote controller for mode lock function according to feature overview table)

Standby Mode

Standard Inverter can minimise power consumption by turning power off on the PCB except for the MICOM which receives signals.

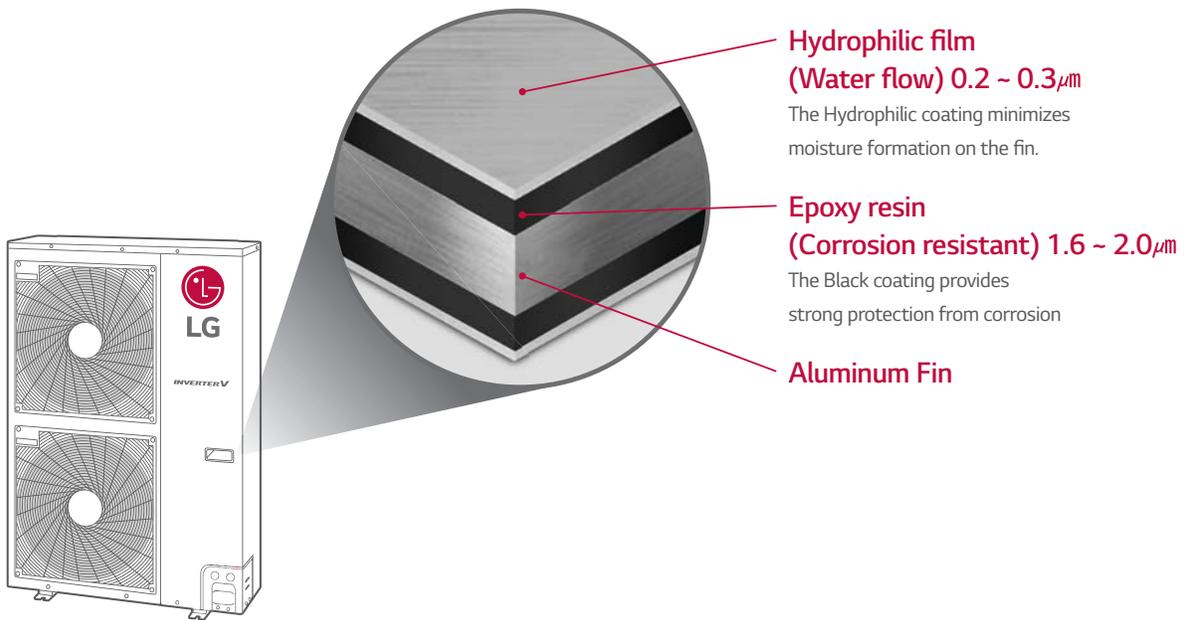

SINGLE SPLIT KEY FEATURES

DURABILITY

COMMERCIAL

Ocean Black Fin

LG's exclusive "Ocean Black Fin" heat exchanger is designed for Improved corrosion resistance.

• Certified protection

- Test Method B of ISO21207, 6.2 & Annex A
- Test condition: Salt contaminated condition + severe industrial/traffic environment(NO₂/SO₂)

* Based on 1,500 UL test hours

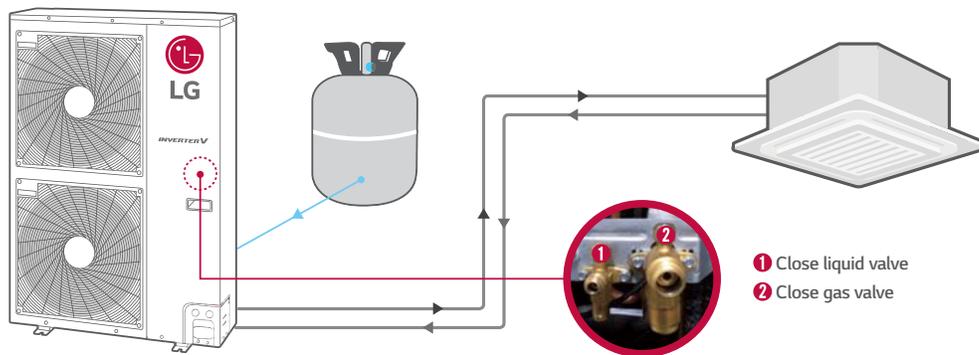

SINGLE SPLIT KEY FEATURES

FAST COOLING & HEATING

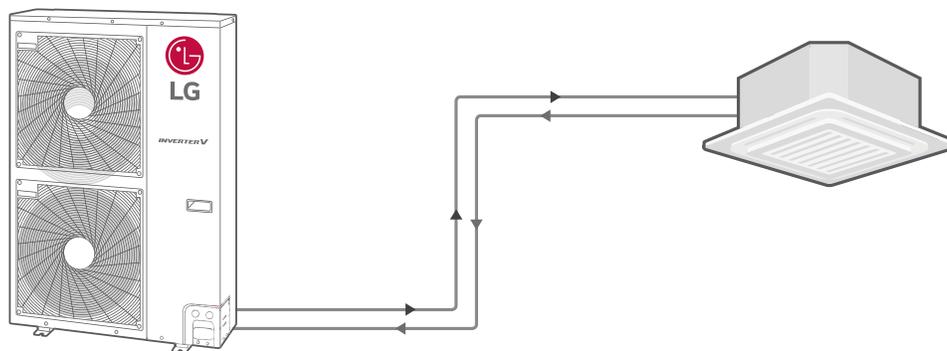

Forced Cooling Operation

This function allows the refrigerant to be recharged or pumped down, regardless of the indoor temperature. Note that this function can be used when indoor units are being moved or repaired.

E.S.P. (External Static Pressure) Control

This function easily controls volume of the air by a remote controller. The BLDC motor can control fan speed and air volume regardless of the external static pressure. Additional accessories are not required to control air flow.

High Head Drain Pump

High head drain pump automatically drains water up to a height of 200mm of drain-head height. It provides the perfect solution for draining of water. (Standard Inverter : Accessory (ABDPG) / Low-Static Duct : Included)

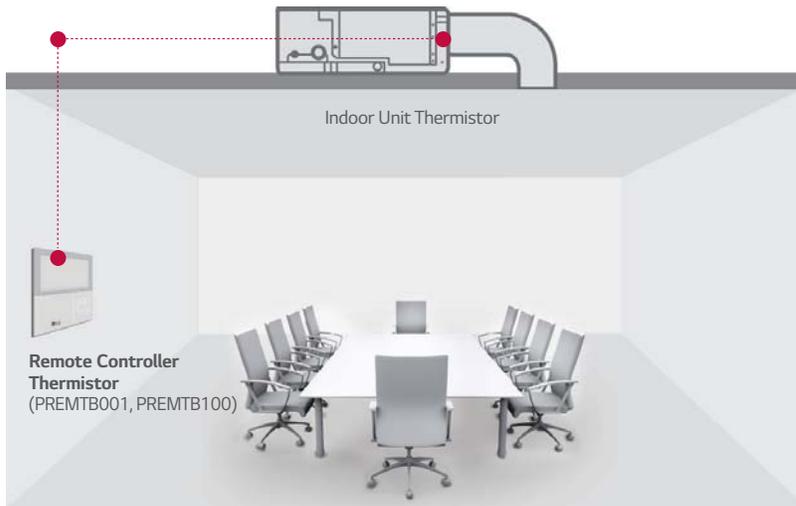

Available for Natural Drainage
 Detachable Drain Pump

SINGLE SPLIT KEY FEATURES

CEILING CONCEALED DUCT

Two Thermistors Control

The indoor temperature can be checked using the thermistors in the remote controller as well as from the indoor unit. There may be a significant difference between ceiling and floor air temperature. Two thermistors can optimise indoor air temperature for a more comfortable environment.

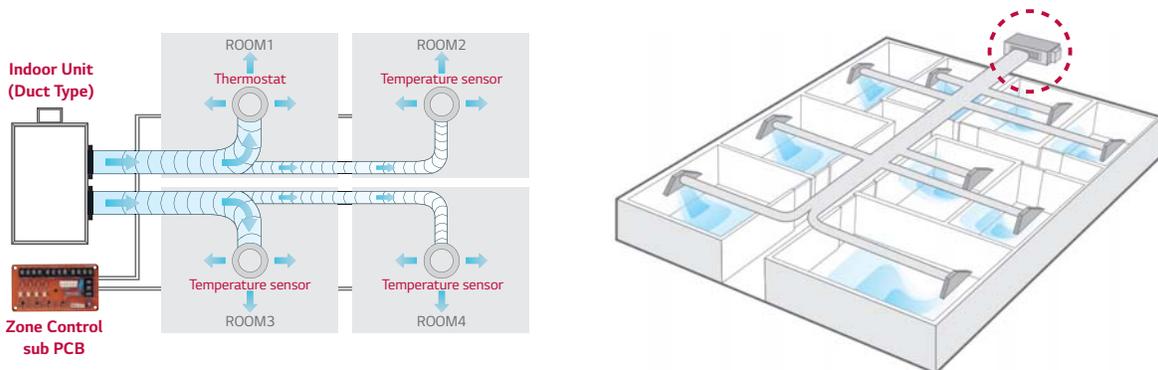

Compares temperatures sensed from different positions, and automatically selects the optimum temperature for users

Operation for Multiple Rooms

Using a spiral duct (Embedded or flexible type) and stream chamber, it is possible to operate cooling / heating for several rooms simultaneously. Also, zone control is available with zone controller accessory (ABZCA)

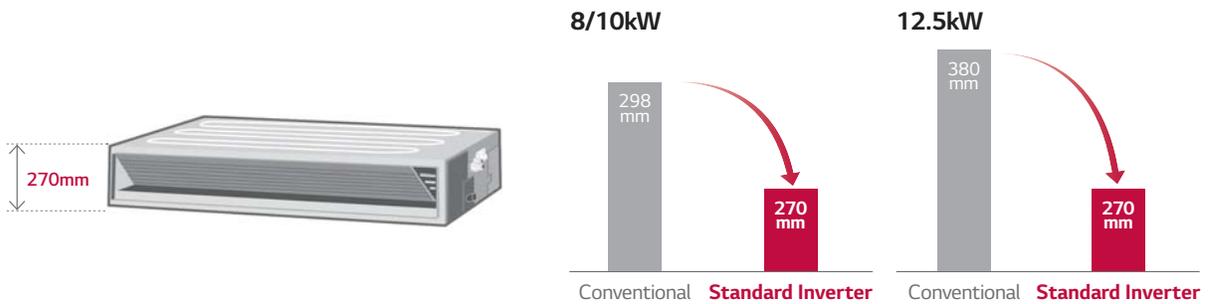

Zone control features

- Controls different zones (up to 4 zones) by external thermostat (AC a24V)
- Maintain proper air volume of each zone
- Auto variation of dampers
- Auto control of fan speed and On / Off operation

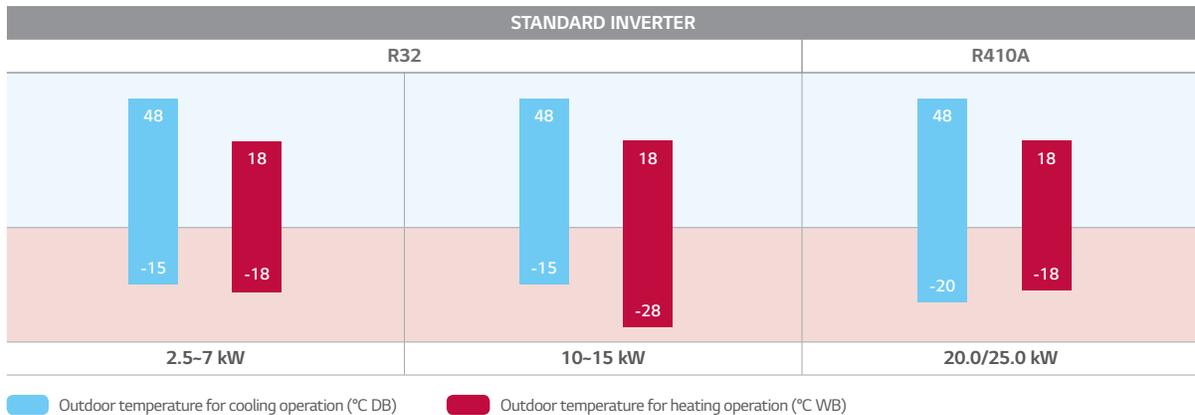

Minimized Height

New mid-static ducts provide ideal solution for installation in limited space.

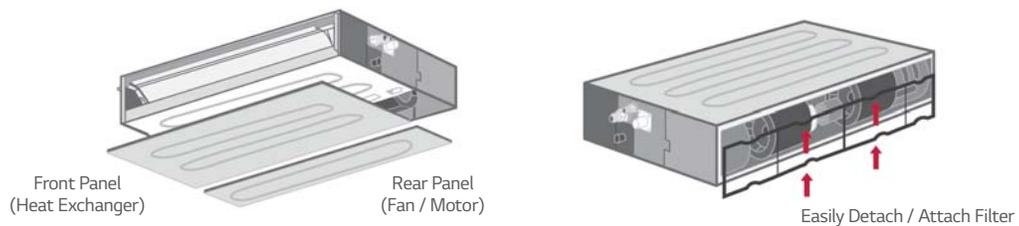

Wide Operation Range

Easy Service & Maintenance

Users are not required to disassemble the whole panel for maintenance; since panel is divided into 2 components; one for heat exchanger and the other for fan/motor. The user can easily detach and re-attach the filter in the available limited space.

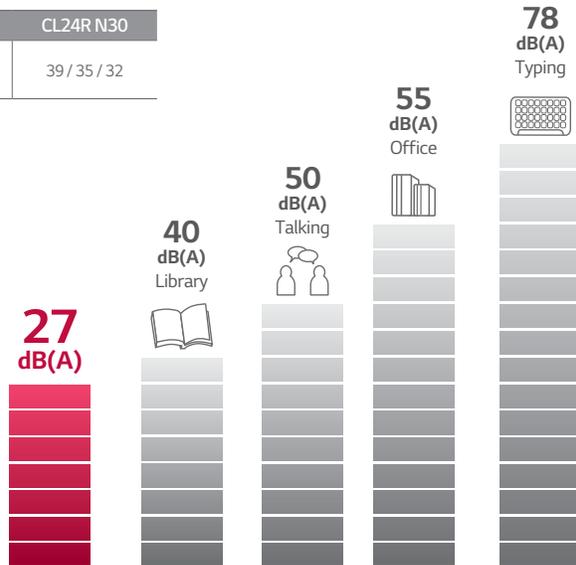

SINGLE SPLIT KEY FEATURES

CEILING CONCEALED DUCT (LOW STATIC PRESSURE)

Quiet Operation

The noise level of low static ducts have been reduced, even though ESP has been increased.

SINGLE SPLIT KEY FEATURES

CONSOLE

Optimised Air Flow for Cooling & Heating

During the cooling operation, the vane adjusts upwards to direct the air flow towards the ceiling.
 When heating, the vane directs the warm air downwards to balance out the room temperature especially towards the floor.
 It is controlled by wireless remote controller which is included indoor unit product

Quick Floor Heating

Console air conditioners portray high speed and powerful performance. Using the floor heating mode, console air conditioners provides floor heating at a faster pace and helps to reach the desired temperature quickly.
